

An illustration of a classroom scene. On the left, a teacher with red hair in a bun, wearing a blue long-sleeved shirt and a long skirt with a blue-to-purple gradient, stands and points with a black stick at a whiteboard. The whiteboard, which has a thin green border, displays the equation $3+2=?$ in large purple font. On the right, a student with dark skin and curly hair, wearing a rainbow-colored long-sleeved shirt and red pants, sits at a pink desk. The student is looking towards the whiteboard with their right hand raised. On the desk, there are two books, one pink and one purple. The background consists of a light blue grid pattern. Several small, colorful objects (a purple pencil, a yellow pencil, and a blue pencil) are floating in the air around the whiteboard. The floor is a light orange color.

$$3+2=?$$
