

An illustration of a classroom scene. On the left, a teacher with red hair in a bun, wearing a blue long-sleeved shirt and a long skirt with a blue-to-pink gradient, stands and points with a black stick at a whiteboard. The whiteboard, which has a thin gold border, displays the equation $3+2=?$ in large purple font. On the right, a student with dark skin and curly hair, wearing a rainbow-colored long-sleeved shirt and red pants, sits at a small pink desk. The student is leaning back with one arm raised. On the desk are two books, one pink and one purple. The background consists of light blue vertical lines, and there are some floating objects like a pink eraser, a yellow pencil, and a blue pencil.

$$3+2=?$$
